

Client: private

Program: 2 kids' sleeping rooms & 1 bathroom + 1 playroom in an existing attic

Surface: 80 m²

Phase: built

Execution: 2012-2013

Through the proposal of a thorough hierarchy between spaces, both in dimensions as well as in budget attribution, this project of an attic transformation was able to add a "social space" instead of blunt circulation to the list of the clients' demands. This generous space thus distributes 2 sleeping rooms as well as 1 bathroom and a on a very tight budget.
