

Client: AGORA

Program: public space, industrial heritage
reconversion

Phase: competition

Execution: /

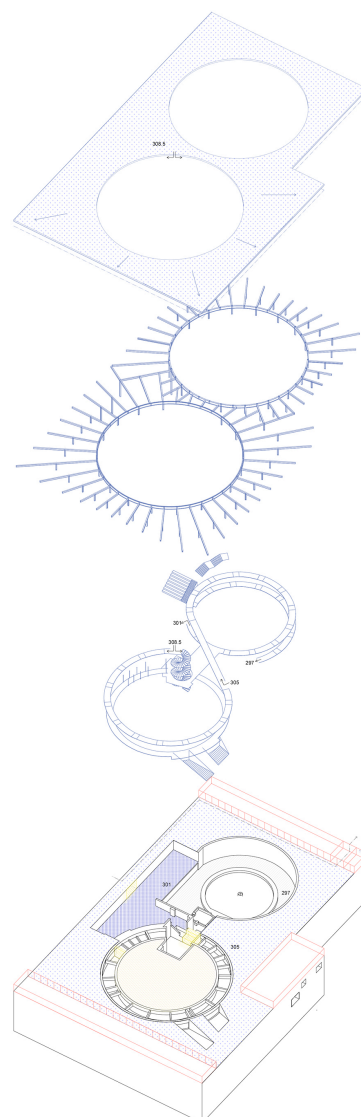

in collaboration with 51N4E (be) Schroeder&Ass. (lu)

Duality & triplicity: 3 universes

A central place exploiting the future duality of the site: as much of the new city, dense, urban and cosmopolitan, as of the industrial heritage, testifying to the cradle of the prosperity of the country and the region; above and under-ground.

This tension will be highlighted and integrated in a harmonious way in the future urban life by a clear and lucid drawing, generating 3 universes,

3 different atmospheres, complementing each- other synergistically,

Luxembourg

On the northern basin, 7 meters below the ground floors, a covered public space with a ceiling height of 7 meters will allow the installation of markets and cultural events such as music festivals.. This will be the “agora” of Belval.
